

clearall-day™

biofilcon A lenses

Suddenly... everything is clear®

- + *Enhanced Comfort*
- + *Enhanced Vision*
- + *Superior Handling for Ease of Use*

Ocular Insight's innovative engineers, scientists and clinical experts have successfully combined the ocular benefits of a biocompatible material - ClearGMA™ - with clinical simplicity of a unique aspheric disposable lens - clearall-day™.

The biocompatibility of ClearGMA™ is achieved through synthesising the compatibility properties of mucin, the body's natural wetting substance.

Wearers benefit from longer, more comfortable wearing times providing them with a truly comfortable "all day" lens.

ENHANCING OCULAR PERFORMANCE

Ocular Insight focused on designing a contact lens superior to the world's leading biocompatible frequent replacement lenses. They addressed this challenge by a biocompatible lens with optimized material, enhanced vision and improved strength and handling. The result is clearall-day™ - a unique aspheric biocompatible frequent replacement lens from Ocular Insight.

ASPHERIC OPTICS

The biocompatible Ocular Insight lens has been designed with aberration correcting aspheric optics to optimize the overall visual experience. The optics incorporate innovative wavefront design and technology.

Visual acuity is optimized over the power range and the optical design is tailored to provide maximum contrast sensitivity particularly in low illumination. The combination of aberration correcting aspheric optics and longer wetting and wearing times make clearall-day™ a truly unique lens.

| SPECIFICATIONS - clearall-day™ | |
|--------------------------------|---|
| Material | 43% hioxifilcon A, 57% water |
| Base Curve | 8.6 mm |
| Diameter | 14.2 mm |
| Handling Tint | Light Blue |
| Power Range | -12.00 to +6.00 0.00 to -6.00 (0.25D steps) -6.50 to -12.00 (0.50D steps) +0.25 to +4.00 (0.25D steps) +4.50 to +6.00 (0.50D steps) |
| Centre Thickness* | 0.08 mm |
| Dk @ 35°C | 19.85 x 10 ⁻¹¹ (cm ² /s)(mLO ₂ /mLmm Hg) |
| Pack Size | 6 lenses |

*-3.00 D lens

Practitioners now have a cost effective option for providing the benefits of biocompatibility, enhanced comfort, longer wearing time and improved ocular health to their patients.

Convert your *low margin* contact lens practice into a *high margin* practice
